SB429

I OPPOSE this bill. So in Oregon 2022 there was 883 suicides 448 of which were from guns, that is 50.7%. My question I guess is what laws are they trying to make to prevent the other 49.3%??? My point is if a human is set on ending their life they will find the means period. I have sadly known a few people who have committed suicide and used other means, three of which hung themselves and one who tied weights to themselves and jumped off a bridge. Should we put a 72hr hold on buying rope also. What about the 1,383 deaths by overdose in that same year? My point is we should consider the solution to the actual problem, mental health issues, not implementing these unconstitutional band-aides
