

Submitter: Carver Akiteru Oblander

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: SB1202

My name is Carver Akiteru Oblander and I live in SE Portland. As the needs of our state continue to grow and evolve, intercity rail will need to be a key part of the transportation picture for Oregonians. Currently, intercity public transit is often an afterthought, and falls to fractured local transit authorities to cobble together. Having a dedicated department at the state level will help keep these efforts on track and ensure they are efficient and prudent investments for our state. Please support this bill to help ensure a better and more accessible future for Oregon's transportation infrastructure.

Thank you for your time.
