Measure, Appointment or Topic: SB1154

There are so many issues with this bill, but here is my main concern: Why is the Oregon Legislature giving the governor unilateral power over local and private water issues? Is the Oregon governor bequeathed with supernatural knowledge upon entering office to understand what kinds of "containments" are a threat, where those "containments" originated from, and who should be appointed to address these local and private issues on a statewide committee? Our current governor does not understand basic human biology or economics, but she understands the complexity of Oregon groundwater throughout the state? Vote NO on SB1154
