

Submitter: Cynthia McAlpine

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Leaders in our federal government are in denial about climate change. Evidence of this is abundant, including efforts to defund FEMA and put the burden of climate disaster response and cost on the states. This is unwise and unfair, and it is one of the reasons I fully support SB 1187, the Super Fund Bill. Ensuring that polluters help pay for climate caused damages is only fair. It's time to demand accountability.
