Senate Committee On Rules

Measure, Appointment or Topic:

SB1054

Yes to SB 1054 to help insure voter integrity. Prior to counting there needs to be citizen ID verification to vote. No more phony voter suppression charge for common sense proof of citizenship. Weak verification rules are an open door for voter fraud. The only real reason any politician is against citizen ID verification is to allow voter fraud for staying in power. It is not difficult to figure this out. Open process for viewing the counting of votes is only one part of the voter integrity process. Every Secretary of State and county clerk should want this measure.

The state of Wisconsin just amended its constitution, adding a decade-old state law that requires voters to show a photo ID before they can vote. Oregon is behind the times on voter integrity. SB 1054 is one link in the chain of voter integrity.
