

Submitter: Joana Kirchhoff

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

The idea of a climate superfund is simple: Fossil fuel corporations exacerbated the climate crisis, and they should pay their fair share of the costs! Make Polluters Pay makes the largest oil, gas, and coal companies liable for the costs of the damage burning fossil fuels has done to human life and our natural environment. This climate superfund will help Oregon be more resilient to extreme weather events including wildfires, heatwaves, and ice storms and fund urgent climate adaptation measures, such as flood protection, upgrades to transportation and electric power grids, home and building retrofits, and more

Many states have this legislation as well as risk bonding for fossil fuel, mining and other uses of natural resources.

Thank you, Joana Kirchhoff
