Committee: Joint Committee On Transportation

Measure, Appointment or Topic: SB723

I fully support two-man cruise. Is it extremely necessary for the safe operation of trains and to the communities. Without two men on the train if something was happened to one or the other you would have a problem. Invented emergency situation a derailment or a vehicle collision or hitting a pedestrian it would be very difficult to do the necessary things you need to to get life support people there to help the injured
