Senate Committee On Judiciary

Measure, Appointment or Topic:

SB1015

I urge you to support SB 1015. In my area of Portland, the work of grassroots groups that are using common sense public health approaches to prevent deaths and injuries by gun by building relationships and giving people alternatives to retaliation has been very effective. These groups are committed, but have difficulty depending on consistent funding. This bill would make a big difference in saving more lives and preventing more family heartbreak and loss. Thank you.
