

Submitter: Rev. Dr. Lucy Hitchcock

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

We are already experiencing, nationally, locally and globally the results of years of profligate burning of fossil fuels and the evasion of responsibility by those responsible for their emissions. Even lies have been expressed by fossil fuel corporations that their emissions are not causing the climate change disasters of fire, flood, rising temperatures, wind damage, and their effects on agriculture and wildlife survival, human health and child development.

Pollution by corporate activities must be measured, curtailed and the damage caused must be paid for by those responsible. This is a matter of conscience and of just economics. Please pass SB 1187.
