

Submitter: Natalie Foster

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Companies that have contributed a disproportionate amount (especially compared to the average tax payer) to global warming absolutely need to be held accountable.

Since the damage is already done, that needs to be done through funding. Without governments to force corporations to take responsibility, we will move too slowly to make any impact on the damage we have done to the climate. It is critical, essential, dire for Oregon to take action.
