

Submitter:	Colby Robeson
On Behalf Of:	Oregonians
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	SB1154

I'll keep this short as I can. I've lived in Oregon my whole life and I oppose this bill for these reasons. A we as land owners front the money for our springs or wells and maintain it at our own cost and our own time won't be getting any help from government fixing the spring after a rainstorm or dealing with our well maintenance and not to mention forcing people to just walk onto private property to check a meter that shouldn't be there.

B I agree we need to do something about water pollution but this isn't the answer. How about we start with things like the last sea food and wine here in Newport. Newport city discharged raw sewage into the bay. Toledo did the same thing. Georgia Pacific using 11 million of gallons of water a day running it through a treatment cycle and sending it off to the ocean. Why aren't we reusing that or all the chemicals and shells being hauled up and dumped in fields along the Siletz river contaminating the water. What about timber company's spraying tons of chemical over there clear cuts that is running off into water systems. I mean the government is overlooking all the big problems and just seeing a way for us the people to have to let people on our private land and pay them more money that they don't deserve which in the end solves not a single thing.

That's my peace. I hope you all tell everyone to oppose this bill and leave a testimony as to why.

Thanks.
