

Submitter: Darrell Gulstrom
On Behalf Of: The Annoying Children
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

I oppose SB 1187

SB 1187 is a CARBON TAX that will raise the cost of energy in Oregon and the cost for every Oregonian!

CARBON TAX was rejected in prior legislative sessions.

Exactly what negative impacts is climate change doing? Are we to believe the nonsense that Al Gore predicted in 2006, which never materialized, there is a reason the Federal Government has taken Global Warming off their websites and are defunding the hoax that the UN has imposed on the World.

Carbon Dioxide is plant food, which in turn produces Oxygen which all humans need to live!

SB 1187 is not about Climate Change but is designed as DEI, as the environmental justice mapping tool is being used, developed under ORS 182.555

The Federal government has rejected DEI as a failed program.
