

Submitter: Robert Raes

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

No matter what I did or my family did or my students did, ALL were responsible for cleaning up their mess. How do we make those polluting our air responsible for cleaning up their mess? How do we make those responsible for dumping waste into our rivers for cleaning up their mess? How do we make those responsible for dumping waste on land to cleanup their mess? How do we make those polluting our air responsible for protecting our precious air? But the big question is WHY is it ALL of our responsibilities to SAVE OUR ENVIRONMENT ? EACH company! EACH school! EACH family! EACH individual!

Recently my family, West Linn Lutheran Church members and those at the 1st Baptist Church HOPE food pantry in Oregon City (both those shopping for food and our volunteers) that we collect recyclable plastics to be made into recyclable products like "lumber". We're trying to do our part. ?? What will you do to help our environment? ??

Please consider the implications your vote has on our environment and how your vote will affect ALL future generations.

Thank you for what you do!
