

Submitter:	John Hall
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	SB1154

SB 1154 is an attack on individual property rights. This primarily negatively affects rural Oregon.

Our wells are dug and maintained by each individual homeowner and farmer. What you are proposing is to control our ability to pull the water from the ground and allow the government to walk onto our property at any time to check regulation. A major impact on farming and cost.

The bill also proposes to allow government to walk onto my property to inspect and regulate my septic system. It also says you can force the property owner to replace their septic system with one the government approves of. This would be a huge monetary hit to each homeowner with a septic system.

My property is not yours to invade at will. The government does not get to tell me how to use, maintain or live on my property.
