

Submitter: Connie Page

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Residents of the beautiful state of Oregon deserve to hold fossil fuel polluters accountable for the damage they have done and continue to do. It is clear that they are unwilling to hold themselves accountable, which makes their actions even more grievous. We need to make our industries focus on how to do better, not just business as usual. Our lives and the lives of future generations depend on it,.
