

Submitter:	Derek Cranley
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	SB1154

I oppose the state government coming into my home, or onto MY property that I pay for (to include excessive property taxes) to install monitoring equipment in order to further burden me and my family with another tax. I bought this property in order to get away from the poor water quality that I was previously provided by the local, and ultimately the broader state government. I have extended myself to the brink in order to provide my family with a very clean and sustainable water source. I also bought this property to enhance my PRIVACY and somewhat self sustainable lifestyle. My property is lined with no trespassing signs and is gated. I have solar and an EV car, thought that would be enough to keep the government from further intrusion. If this moves forward, I will take myself and my family to a more inclusive and diverse part of the country. And you surly benefit from the insane amount of tax my wife and I pay. This may make sense in some arid local, but the broad brush to squeeze as much as you can out of your significant tax paying population. Worst schools in the nation, terrible roads, terrible homeless situation, drugs, unchecked crime. Water in one of the rainiest states in the union should be very low on the list of priorities. Any politician who opposes this, please reach out, I have deep pockets in these situations.
