

There seem to be no common sense in Salem. And SB 1154 is one of them. And now I read about **proposed lithium mine in eastern Oregon would allow 260+ drill sites on public land. Public comment opens through April 25.** Our government is thinking about allowing a foreign government to mine lithium in our state???

No wonder people are moving out of Oregon and business are closing their doors.

This and many other bills should be a hard NO.

PLEASE VOTE NO, on SB 1154

Sincerely,

Karen Traner-Bartley
