On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety
Response

Measure, Appointment or Topic: HB3946

To the members of the JACSR and staff:

Thank you for the work you do, and for giving me the opportunity to testify in favor of this measure. To me, the intention of the original language around schools in Measure 110 was to attempt to prevent drug-related crimes in areas where children and minors are often present. This is a notion I whole-heartedly support. The measure being discussed today simply widens the net by updating this language to include preschools. As the parent of a preschooler who spends 8 hours a day attending Arc-en-Ciel Montessori across from Dawson Park, this matter is especially important to me, and the other parents of the students there. I think we should make every effort to improve the safety of the areas surrounding our schools, and this measure is a simple correction that does just that.

Thank you for taking the time to read my testimony, and again, for the work you all do.
