

Submitter: Cristy Bennett-Gilmer

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

When will enough be enough? Please do NOT support another climate taxing bill. I have become convinced that all Salem wants to do is squeeze every single last ounce of blood, sweat and tears out of Oregon citizens through taxes and imposing fees on everything!

The majority of citizens do NOT see climate change/issues as a dire situation. What they do see is their increasing inability to pay for power, heating, gas, water, food, RENTS and Mortgages, etc. People need to be able to KEEP what they earn instead of having it constantly siphoned off the top and bottom of their ever shrinking incomes.

Oregonians need some RELIEF not more taxes! It would be nice if our elected officials would care about their own constituents instead of furthering global agendas that do nothing but fleece the working class and never achieve ANYTHING that helps!
