Measure, Appointment or Topic: SB1187

This bill is an opportunity to lead the nation with a real, tangible actionable plan to prepare Oregon for future climate disasters. The corporations that make their profits damaging the environment in Oregon have the responsibility to pay for the damage they have caused. The climate disasters caused by the behavior of these corporations cost the state of Oregon money. It is common sense that those causing costly disasters should bear the economic responsibility to mitigate those disasters.

I urge you to invest in a more resilient future for all Oregonians by supporting SB 1187.
