On Behalf Of:

Committee: Senate Committee On Natural Resources and  
Wildfire

Measure, Appointment or  
Topic: SB1154

I am a state certified systems operator we can barley afford our routine sampling now, the closest lab is almost 2 hours away and as I read that's one of the key points as well as monitoring the wells (which I already do for my job). We already have system inspections that work fine. Now as a private citizen its my land and well, I paid for them not the state! Show me the receipt the state owns all the water underground, in the sky and on the surface. Would you like me to go into your kitchen and take samples or limit your shower to a gallon when i think somethings wrong, no you wouldn't . I do understand the affected areas need help but this is bill is so wide open, people that are not affected will be when some person on this staff/committee wakes up one morning and throws a dart at the wall, then poof some other individual gets throttled by this bill.
