

Submitter: David Gray

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB1015

With our state treasury already being in the negative due to other special interest projects and violations of federal law and executive order (DEI, LGBT, Men in Women's sports, and immigration to name a few), this bill would add even more debt to We the People. This bill is nothing more than a nocturnal emission for groups like Mom's Demand Action, and other groups funded by Bloomberg and Soros.

This bill and others like it should never see the light of day due to the cost and the fact that no matter the result there will never be any laws that can be passed. We already have laws against assault, murder, robbery on the books; enforce those instead of looking for more ways to violate your constituents' inalienable rights.

If a statute, rule, law, or regulation violates any inalienable rights that statute is invalid. (See the following: Marbury v Madison, US Constitution including amendments, Declaration of Independence, 18 US Code Sections 241 and 242).

By even writing this and other bills to restrict rights you have violated your oaths of office, and as such you are possibly committing treason, and we are still at war (Global War on Terrorism) which means any conviction for treason could end up with the death penalty.
