Committee: Senate Committee On Judiciary
Measure, Appointment or Topic: SB1015

Salutations,

I oppose SB 1015 on the merits how this bill came about. This was put together practically overnight in that only select few knew about. Only couple groups knew of this bill and invited personally.

The definitions of community safety groups is only by opinion, and that opinion has already been made clear by who was invited.

This bill was written because federal funding being cut off to non-grassroots groups claiming to be grassroots. Grassroots groups and organizations don't need public money or funding.

The groups invited by the likes of Moms Demand Action known to misinform public and claims, run away from being informed and keep ignorance alive when it pertains to public safety by applying bandaids to any problem while refusing to dealing with the source of the problem; by advocating dumping funds to a problem without solution to the root cause of any problem.

I urge not to pass this bill to allow everyone a chance to have their word spoken about this. The timing of this bill essentially was put up not even a week ago, the day public testimony started. The idea is deceiving from the beginning, and will be deceiving hince forth.

Tony from Lincoln County.
