

Submitter: Lauren Schreoder

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

With the new administration, our climate measures have and will certainly fall short of what is needed to clean up our environment. It is clear the primary offenders rarely pay the price of clean up nor take responsibility for their actions, their contributions. I want what is fair for both sides, and certainly to require the responsible parties to pay their share. I ask that this bill pass to provide such.
