

Submitter: Thao Ly

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: SB1202

I come from the Portland Metro area, which already has a robust transit system that has only continued to improve. The MAX system especially has greatly improved my personal freedom and love for my community. I have several options for transportation around my city, but to know that the northeast has little or none, to hear that there is no public transit option along I-84, tells me that the state is not doing its duty to support its all citizens. Having a committee dedicated to addressing these problems would be a step in the right direction.
