

Submitter: Karen Goodness

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Correction to my testimony:

Energy weapons cause the tire rims to melt but leave the bushes and trees and the beam can be seen by radar I thing and they can be aimed via satellites or planes etc. They burn hot especially after chemtrailing and spraying aluminum. Energy weapons do not burn or ignite blue roofs, blue umbrellas, blue cars, or blue t-shirts etc. this is very strange.
