

Submitter: Teah Laviolette

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: SB1154

This is not good sound resource management or environmentally protective of Oregon's groundwater supply, it is an attempt by megalomaniacal city dwelling money grabbing, power hungry democrat politicians and legislators to once again attack private property owners, farmers, ranchers, and rural communities. They want control of every aspect of our lives. Water is life, therefore, controlling water supplies, watersheds, wells water sources on private properties, even rainwater containment, gives them power and control over mostly conservative, independent, rural landowners and communities. They want control of all of it, they do not want you or me - the average hardworking tax paying citizen having autonomy of our own private property or water sources therein. They hate freedom, self determination, and those of us that believe in independence from government interference in every aspect of our lives. This is nothing more than government overreach in an attempt to grift more funding for nefarious wasteful, fraudulent and corrupt government spending of our hard earned money and making private land owners, ranchers, farmers, and rural communities "bend the knee" to government overlords just to use our own abundant, renewable, clean life giving water. These democrat lawmakers sure do like to tell us an abundance of things that they claim should be necessary human rights, such as free needles for drug addicts, free healthcare for all - even non citizens, free housing in government funded crime riddled, filthy, unsafe subsidized housing and ghettos, free phones and iPads for incarcerated criminals in detention centers, jails, prisons across the country at our - tax payer expense so they can continue their nefarious criminal activities like cartel - gang drug and human trafficking, fraud, theft, harassment of victims and witnesses...

But my goodness no way should a private property - land owner, rancher, farmer, small rural community have minimal government interference or control over their own resources such as well water, creeks, streams, or even puddles that have been utilized for generations without any problems that would necessitate or require government involvement or intervention. Shame on you democrat legislatures and government officials for even attempting this false narrative claiming to ensure water quality and quantity, this is a complete lie so the state can play socialist nanny and have control and profit from unnecessary and over burdensome regulations, licensing, fees, and taxes, but it sure would fund another worthless government agency, office, state employee positions...no absolutely not, as you Dems like to say in your ridiculous wasteful disruptive protests, HANDS OFF our private property wells and water rights!
