

Submitter: Kim Alexander

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2749

Greetings to the members of this committee,

As a St John's neighbor of almost 11 years, I urge you to vote in support of this bill. It is vital that the funds be appropriated in order to support the integrity of our bridges and infrastructure, but perhaps more lasting is the security and peace of mind that residents of this area will be able to evacuate to safety when the imminent earthquake occurs. There is no excuse that I could possibly think of that would cause anyone to vote no on something they know would save thousands of lives and millions to billions of dollars in the long run.

Thank you so much for your support of our neighborhood and community as you vote in support of this bill
