

Submitter: Mark Kenzer
On Behalf Of: Planet Earth and all inhabitants
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

The time has come to hold those accountable for cleaning up the mess that they help to create and profited upon. "Oil companies, including Exxon, were aware of climate change as early as the 1950s and 1960s, with internal research confirming the link between fossil fuel combustion and climate impacts. Despite this knowledge, they engaged in disinformation campaigns to downplay the risks and avoid regulation for decades."
