

I live in St Johns with my daughter. It is imperative that you support HB 2749 for the safety of the people in this area. A massive earthquake is anticipated and it will cause us to be stranded because our bridges are not able to withstand such an event. We will be cut off from emergency vehicles, medical care, food supplies, and loved ones. In addition we will be stuck with the huge quantity of toxic chemicals that are concentrated nearby that will most certainly break open and be unleashed into our immediate environment when this occurs. At the very least please provide us a secure bridge so we can survive this event. Have a heart and do the right thing for this community.
