Joint Committee On Transportation

Measure, Appointment or Topic:

HB2749

I support this bill because in the event of an earthquake, if the bridges over the railroad cut in north Portland did collapse, access to St Johns would become severely limited with only North Columbia Blvd. being the only road in or out. of the north peninsula. There are two grocery stores that would need to receive products so that the community could be sustained. But an even bigger issue is the North Peninsula has no Hospital. Transportation to Emanuel Hospital or Good Samaritan Hospital would be difficult for those who live there without bidges ove the Railroad cut on Willamette Blvd, and Lombard Street.
