

Submitter: Stephenie Ward
On Behalf Of:
Committee: Joint Committee On Ways and Means
Measure, Appointment or Topic: HB5006

I stephenie ward , home owner , mother , and employee, OPPOSE this bill. I listen for an hour of testimonies and I didn't hear how anyone would cut waist, or cut funding illegals. It seems some of this was good and justified but for example: the Education department- They need to hold students accountable- They are not preparing them for work force - these students are not going to get away with saying "no" at a job- because they don't want to. They give them IEP's - they don't even give students with IEP homework- even in high school if they miss a week- oh and then they can also get- (even though their comprehension has been proven to be fine- and they can do the work when they want to) they can get modified or Disability diploma because someone in Portland found a loop hole for kids with behavior problems. They put these kids in the same category as disabled. They are not.

Mortgage, rent, food, gas, all bills gone up. 2020 when everyone was trying to figure out what Covid was , and someone decided everyone needed a pay raise putting people in different tax brackets while inflation hit and the price of everything went up- and we are now paying more taxes, Government doubled, illegals doubled. If you raise our property tax, gas , and income tax , inflation will continue to rise. I believe we need Less government- less wasteful spending- and tax reduction for all - will help our people!
