Joint Committee On Transportation

Measure, Appointment or Topic:

HB2749

Please this bridge design funding for St Johns. The people who live here need to be able to flee to safety if an earthquake takes out the RR Bridges. This is especially true since the air after such a quake will likely be toxic to breathe due to the poisonous tanks farms which will, at MINIMUM, leak their gases into the surrounding area, and more than likely will ignite and explode into a toxic plume over St Johns and Linnton. Please fund this bridge improvement across Columbia Blvd..
