

Submitter: H Michelle Johnson

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2749

I live in St Johns. I was dismayed to find that there are apparently no earthquake proof bridges spanning the railroad cut. Therefore my fellow residents and I will be cutoff from the rest of the city in the aftermath of a substantive earthquake. An earthquake we all have been told to prepare for. So I vehemently support this bill to fund improvements to the Columbia Blvd bridge spanning the cut. This is a long overdue preparation. Please vote in favor of this bill. Many lives could be lost with bridge damage that would render emergency services from reaching our neighborhood.
