Joint Committee On Transportation

Measure, Appointment or Topic:

HB2749

Hello, I am a parent of a young child in St. Johns. We are all well aware that a major earthquake is a very real possibility. The people of St. Johns live in an especially vulnerable area with all of the industrial risks nearby and our reliance on bridges to escape. We need to take basic measures to ensure our survival in the event of a disaster. Please make sure that the people of St. Johns have a way to evacuate.

Thank you.
