

Submitter: Ruppert Reinstadler

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2945

The last thing we need is to take more money that could be used to actually educate kids and spend it on a boondoggle climate idea. Electric busses still need power to charge them - power from fossil fuels. Electric busses are also not very efficient in colder weather in some of our outlying counties. This is a bad bill and it should not be passed out of committee.
