Committee:	Joint Committee On Transportation
Measure, Appointment or Topic:	HB2945

I strongly oppose HB 2945! How will zero emissions school buses help our school children? This bill is designed for 15 minute cities which Oregon does not have . Most of Oregon is rural and electric buses don't hold a charge long. Winter months reduces the charge. Oregon children are all ready not getting the education they need. How will purchasing a \$300,000 bus help? Use the tax dollars wisely and use it for education NOT for electric buses.
