

Submitter: Teresa Mueller

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2945

Let's invest in our future and hurry along Oregon's transition to zero-emission school buses.

Many current school buses run on diesel — a known carcinogen and a major contributor to asthma, bronchitis, and other respiratory issues. This is not fair for our precious future generations!

The economics of going electric is something I can vouch for. I've had two electric cars and they've been great and trouble free, costing less to fuel and maintain. Tax payers like the sound of that!!

Please fund HB 2945. It is good on so many levels.
