Joint Committee On Transportation

Measure, Appointment or Topic:

HB2749

I'm writing in support of HB 2749. I live in St. Johns. We in our community know that if, or more accurately when, there is a disaster, if the bridges fail, we will have no access to medical care, food, or other necessities. I have heart failure. I am very afraid of what could easily happen to us. Also, if the tanks across the river are ruptured, which they would be in the event of a large earthquake or other major disaster, we would have no way to escape the cloud of poison gas that would result. Please facilitate the construction of an updated and functional bridge on Columbia.
