Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

HB2540

I can no longer be a patient of big healthcare corporations because they all function the same. They focus more on their revenue than patient care. Even with my insurance coverage, I was unable to have a annual check up because my PCP always got overbooked their schedules. Recently I found a PCP at a direct patient care clinic and I am so pleased with my choice. This new PCP truly cares about me, and address my concerns in time. I have established a great connection with my PCP and there is no barrier between my health and the care she provides: no complicated processes, no money involved. I still have my insurance and I wish my insurance would credit my subscription as deductible since I'm gonna stick with this PCP for the rest of my life. I strongly believe patients should have option to choose direct patient care model without worrying about coverage. I strongly believe health insurance should extend their lists to help patients get more access to the right care. I strongly believe insurers should credit bills paid to providers.
