

Submitter: Michael Kelley

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Capital Construction

Measure, Appointment or SB5505
Topic:

Capital improvement of hatchery facilities is a necessary ongoing expense in support of the public recreational opportunities expected as part of the fishing license fees, and also for the support of the commercial salmon fisheries as there isn't a self-sustaining salmon population due to degraded spawning habitat. Spending this money is an investment in Oregon's economic future as well as the happiness and well-being of it's citizens.
