With reference to the -3 amendment to SB797 I would like to point out that this small change will allow the Oregon Film and Video office to continue to ensure that accounting standards are upheld in the reporting and auditing our office does while acknowledging the way payroll companies and CPAs operate in the creative production industry. By altering the wording in the statute from "must" to "may" and allowing our office to still have the ability to require a CPA on projects while not requiring it on all projects addresses this process issue.
