

Submitter: Sheri Winters

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2945

Dear Joint Committee on Transportation,

Please vote no on this bill. Electric buses are just an example of robbing Peter to pay Paul. Just a few ways that this is a bad idea. Electricity doesn't magically appear.

Converting to electricity makes pollution, costs money, etc. We also do not have infrastructure to provide enough electricity to charge these buses. School districts are already struggling with budget deficits. Another thing to consider is that roads will wear out so much more quickly with the heaviness of these buses. Just say no to this kind of waste. Vote no on HB2945
