Resources, and Water

Measure, Appointment or SB733  
Topic:

I support this bill. In the past I have had neighbor owned dogs kill our livestock, and felt powerless to legally address the situation. The dogs quickly get into a pack mentality and go on a killing spree, not for food in this case, but for sport.

Our animals were 4H milk goats and they absolutely tore them to pieces, there was no way to save them, they were still alive when we finally ran the dogs off but they all had to be humanely dispatched .

What was very disturbing was the dogs then turned on us when we interrupted the slaughter. It took our whole family to turn them away, but it was very scary the way they responded.

These were neighbors dogs, pets that played with their family's kids. They would let them out to run in the and they would quickly gather with other dogs, pack up and look for trouble.

It was very traumatic to have this happen to animals you raised and cared for, and it led to a distrust of dogs for many years.

It's in a dogs nature but it's a human problem that makes it a dog problem. Please support this bill to protect our livestock, pets, and family's.
