

Submitter:

Peter Fargo

On Behalf Of:

Committee:

Joint Committee On Transportation

Measure, Appointment or Topic:

HB2945

My 11-year-old daughter rides the bus to school every day, and I am about to pick up my 6-year-old son at the kindergarten bus stop. These children and their young lungs deserve clean air, and we have the power to give it to them. Clean electric buses will improve their health and therefore also their ability to learn and grow. Clean electric buses will also benefit the health of the whole community, and the batteries will provide backup energy storage and resilience when needed. These buses will also be a powerful educational tool to show students, and the whole community, what is possible with electric technology. Please support this bill.

Very respectfully,

Peter Fargo
