A person cannot own a law practice without being a lawyer. Why on earth do we allow private equity, financial investors, and insurance companies own medical practices, hospitals, clinics???

This is especially unethical when the owner is an insurance company, a subsidiary of an insurance company, or a medical professional associated to an insurance company. Then the company (which makes the bulk of their money through denials and delays) owns "both ends of the street," and has complete control over doctors and patients. This creates suffering and death.
