

Submitter: Wendy Lawton  
On Behalf Of:  
Committee: Joint Committee On Ways and Means  
Measure, Appointment or Topic: HB5006

Co-Chairs Lieber and Sanchez, and members of the committee,

Of all the good work you can invest in on behalf of Oregonians, investments in heat pumps - and helping folks navigate these and other home upgrades - is so smart. Helping people pay to electrify their heating and cooling systems - and helping people know how to access all the incentives and rebates - will save your constituents money, protect the climate, and support business. You can also keep Oregonians safe from extreme weather by funding community resilience hubs. This gets disaster support out where it's needed most - in our neighborhoods. Nothing is more important right now than protecting against the worst of our disasters.

I am writing to urge you to prioritize protecting our climate progress and continue investing in our climate resilience. We're facing great chaos and uncertainty at the federal level, including attacks on clean air and water, affordable energy, and the integrity of our public lands. If we fail to act and protect our climate progress, it's our frontline communities — people with disabilities, rural families, people of color, and working folks — who will be hurt first and worst. But every Oregonian will feel the impact. Investing in climate resiliency means investing in community resiliency. We all deserve to breathe clean air, drink safe water, and heat and cool our homes without facing outrageous utility bills.

That's why I'm asking you to fund programs that will:

1. Ensure Oregonians can heat and cool their homes affordably – without having to choose between keeping the lights on or putting food on the table:

Heat Pumps (Oregon Dept. of Energy programs) - \$30 million for Rental Home Heat Pump and \$15 million for Community Heat Pump Deployment Programs. For many families, a heat pump can be a lifeline. Heat pumps mean lower utility bills when costs are skyrocketing, safety from deadly heat, and being able to afford and stay in housing. These programs help keep people safe, housed, and secure in their communities.

One Stop Shop 2.0 (HB 3081) - Oregonians need more support navigating all the programs to upgrade their homes and buildings through incentives and rebates for efficient heat pumps, improved insulation, sturdier doors and windows, and clean electric cooking. One Stop Shop 2.0 will help families get direct assistance from someone in their area to make their home projects more affordable.

2. Ensure our communities are prepared for extreme weather events. Heat domes,

wildfires, ice storms, drought, and extreme weather are growing more common and more devastating – and taking a serious toll on our health, safety, and economy:

Community Resilience Hubs (ODHS) - \$10 million for community resilience hubs and networks across the state to coordinate and provide access to resources and services for vulnerable populations during disasters.

Thank you for your time and for investing in a resilient climate future for all of Oregon.

Wendy Lawton
