

Submitter: Jim Yang
On Behalf Of:
Committee: Joint Committee On Ways and Means
Measure, Appointment or Topic: HB5006
Co-Chairs Lieber and Sanchez, and members of the committee,

I am in support of anything we can do to help the environment, and decrease air pollution. Growing up, I remember walking home from Clackamas High School, and breathing in the exhaust fumes from the cars and trucks near the busy road. Diesel trucks were the worst offenders. Later I learned that diesel exhaust is carcinogenic and that made me realize the connection between the quality of our environment and the quality of our health. That made me want to do something to help the environment, especially when it came to air pollution.

I am writing to urge you to prioritize protecting our climate progress and continue investing in our climate resilience. We're facing great chaos and uncertainty at the federal level, including attacks on clean air and water, affordable energy, and the integrity of our public lands. If we fail to act and protect our climate progress, it's our frontline communities — people with disabilities, rural families, people of color, and working folks — who will be hurt first and worst. But every Oregonian will feel the impact. Investing in climate resiliency means investing in community resiliency. We all deserve to breathe clean air, drink safe water, and heat and cool our homes without facing outrageous utility bills.

That's why I'm asking you to fund programs that will:

1. Ensure Oregonians can heat and cool their homes affordably – without having to choose between keeping the lights on or putting food on the table:

Heat Pumps (Oregon Dept. of Energy programs) - \$30 million for Rental Home Heat Pump and \$15 million for Community Heat Pump Deployment Programs. For many families, a heat pump can be a lifeline. Heat pumps mean lower utility bills when costs are skyrocketing, safety from deadly heat, and being able to afford and stay in housing. These programs help keep people safe, housed, and secure in their communities.

One Stop Shop 2.0 (HB 3081) - Oregonians need more support navigating all the programs to upgrade their homes and buildings through incentives and rebates for efficient heat pumps, improved insulation, sturdier doors and windows, and clean electric cooking. One Stop Shop 2.0 will help families get direct assistance from someone in their area to make their home projects more affordable.

2. Ensure our communities are prepared for extreme weather events. Heat domes,

wildfires, ice storms, drought, and extreme weather are growing more common and more devastating – and taking a serious toll on our health, safety, and economy:

Community Resilience Hubs (ODHS) - \$10 million for community resilience hubs and networks across the state to coordinate and provide access to resources and services for vulnerable populations during disasters.

Thank you for your time and for investing in a resilient climate future for all of Oregon.

Jim Yang
