

Submitter: Pat Mahoney
On Behalf Of: Vulnerable populations youth and elderly
Committee: Senate Committee On Finance and Revenue
Measure, Appointment or Topic: SB927

I oppose this bill

This is a sin tax being opposed on the vulnerable populations, the elderly, and young drivers trying to purchase a car or home to fit with expensive panels, wind, etc.

This helps no one. Those in rural areas do not have access to electric busses. Many/most homes have so much rain or cloud cover that solar power is unreliable, and many not enough property or wind to utilize that green energy.

The amount of taxes on tires, gas (yearly increasing plus new taxes without transparency on gasoline), more road taxes - this simply is unreasonable, unfair to vulnerable populations and the availability of electric charging stations in many counties. It will eventually require all homes ranches and farms to utilize the power of green while our homeowners, farmers, and ranchers are already barely able to break even. The corporations that will benefit are the Big Corps run by boards looking for their bottom line like hospitals, insurances, Monsanto. I oppose this measure STRONGLY.
