Committee: Senate Committee On Education

Measure, Appointment or Topic: HB3218

I oppose this bill but let it be made known that I do not wish for anyone to be disallowed entry into schools on tribal lands or public institutions.

However, we have the lottery. For FY21 here are the sobering numbers: More than \$2.7 billion in "prizes" and \$502 million to state and local programs, that's the bottom line for FY21.

What if in a logical move, the prize amount in billions is lowered to \$502 million and the \$2.7 billion, used for tribal and all institution entry into public institutions?

And HERE:

<https://www.oregon.gov/ode/schools-and-districts/grants/Pages/K-12-School-Funding-Information.aspx> 1. High cost disability 2. Facility grants 3. State school funds 4. Common school funds 5. Local Option Equalization Grant

AND HERE:

Income taxes

Success tax

Corporate tax

A little math: For the number of students in K-12, and grad degrees, the amount paid across all equals approximately \$2,463,408,000. For all grad school students: 125,000,000 (so give or take, 3 billion so please explain \$67 billion). Like I said, turn the 2.6 billion from lotteries for tribal and continue the 3 billion and education should well be covered.

Otherwise, this is just another tax.
